(Cannabis) Tablets 12.5 mg, 25 mg, 100 mg

## The measurable, prescription cannabis tablet.

### WHAT IS IDRASIL™?

Idrasil™ provides all of the medicinal benefits of cannabis without the risks of smoking or the unpredictable dosages of edible confections.

Idrasil™ eliminates the negative social stigmas associated with medical cannabis and replaces them with an all natural nutraceutical that looks like any other pill.

As a harm-reduction agent, Idrasil™ should be written first in opiate-intolerant and particularly opiate-naïve patients.

New patients who are not opiate-dependent will now have the option to live addiction-free with zero opioid dependency and effective pain management with a cannabinoid based regimen.

### HOW DOES IT WORK?

Our proprietary technology and process sleep apnea harvests the THC and cannabinoids from the cannabis plant. This results in a purely extracted nutraceutical that gives the full range of all 80+ naturally occurring cannabinoids.

Oral cannabinoids are absorbed through the portal vein in lipids and assimilated via first pass metabolism, returning 6% of ingested cannabinoids to the bloodstream. The percentage of cannabis reaching the bloodstream can be increased by taking Idrasil™ with a fatty meal.

When taken properly, patients suffering from pain, insomnia, digestive disorders and psychological issues can benefit from Idrasil™.

### PAIN

- Intermediate pain (+3-7)
- Neuropathic pain
- Musculoskeletal pain
- Headaches, Migraines, Seizures
- Reduce total amount of medications as a harm reduction agent

### INSOMNIA

- Safe and effective sleep aid
- Restless Leg Syndrome
- Peripehral Neuropathy
- Sleep Apnea

**Idrasil**<sup>™</sup>  
(Cannabis) Tablets 12.5 mg, 25 mg, 100 mg

### DIGESTIVE DISORDERS

- Reduces intestinal inflammation in Chron's
- Relaxes bowel spasticity in IBS
- Reduces gastric acid production
- Reduces chemotherapy nausea
- Improves blood flow to the intestines promoting healing

### PSYCHOLOGICAL

- Autism
- Depression
- Anxiety / Stress
- Headache Pain / Migraines
- ADD / ADHD
- PTSD
- PMS
