Idrasil™

(Cannabis) Tablets 12.5 mg, 25 mg, 100 mg

WHAT IS IDRASIL™?

Idrasil™ provides all of the medicinal benefits of cannabis without the risks of smoking or the unpredictable dosages of edible confections.

Idrasil™ eliminates the negative social stigmas associated with medical cannabis and replaces them with an all natural nutraceutical that looks like any other pill.

Advantages of Idrasil™ vs traditional Medical Cannabis

- Standardized 12.5 mg, 25 mg, 100 mg Tablets
- NON-Addictive
- No Smoking Required
- Aseptically processed & bacteria free
- Harm Reduction Agent
- Covered by most Health Insurance
- No Intoxication when taken at Prescribed Dosage

HOW DOES IT WORK?

The human body was built for cannabinoids. These nutritive substances play a critical role in protecting cells against disease, boosting immune function, protecting the brain and nervous system, and relieving pain and disease-causing inflammation, among other things.

Cannabinoids are active chemicals in Cannabis that have effects throughout the body, including the central nervous system and the immune system. The most studied cannabinoids are THC, CBD, CBN and CBG.

There are two types of cannabinoid receptors in the body, the CB1 variety which exists in the brain, and the CB2 variety which exists in the major organs and throughout the body. Each of these receptors respond beneficially to cannabinoids.

A primary concern of physicians state wide is that there isn't a standardized cannabis medication available in a consistent dose, like any other pill. Finally Idrasil™ is now available for patients to fill this void.

PAIN

- Intermediate pain (+3-7)
- Neuropathic pain
- Musculoskeletal pain
- Headaches, Migraines, Seizures
- Reduce total amount of medications as a harm reduction agent

INSOMNIA

- Safe and effective sleep aid
- Restless Leg Syndrome
